Date:
June 2026

1. WHAT IS ONECARD?

OneCard replaces monthly paper student cards with permanent PVC cards containing QR codes. When scanned, the system instantly shows the student's photo, name, class, and fee balance. It automatically records attendance, controls meal access, and tracks student movement.

****One card. Entire school life. No monthly reprinting.****

2. KEY FEATURES

Feature	What It Does
Permanent Student Cards	One PVC card with QR code – lasts until graduation
Instant Fee Verification	Scan card → See balance in 2 seconds
Automatic Attendance	Recorded every time a student is scanned anywhere
Meal Access Control	Day scholars get lunch only; Hostel gets all meals; Prevents double-serving
Movement Tracking	Records when students leave and return; Shows who is outside
Gender Analytics	Attendance reports filtered by Male/Female per class, stream, and school
Teacher Dashboards	Weekly attendance charts, gender distribution, absent student alerts
Staff Messaging	In-app chat between teachers, bursar, and administration
Card Design & Printing	Color-coded cards by class level; Print with photo, QR code, and barcode
Fee Reports	Filter by Cleared/Not Cleared; Export to Excel or PDF
Mobile Friendly	Works on phones, tablets, and computers
Role-Based Access	Super Admin, Admin, Bursar, Gate Staff, Class Teacher – each with specific permissions

3. HOW STUDENT DATA IS MANAGED

We offer TWO options for managing your student and payment data. Please choose one:

OPTION A: STANDALONE SYSTEM (Recommended)

****OneCard becomes your complete school management system.****

Aspect	Detail
-----	-----

****How students get in****	You provide an Excel file with all students (names, classes, streams, categories). We import them once into OneCard.
****How payments get in****	Every week, the bursar uploads payment reports from MTN Mobile Money or Airtel Money as an Excel file.
****Where data lives****	Hosted on a secure cloud server (Render). Accessible from anywhere.
****Internet needed****	Only when uploading files. Scanning and day-to-day use works without internet.
****IT support needed****	Minimal – bursar handles file uploads.
****Setup time****	1 week from receiving your student data.
****Monthly cost****	~\$14 (approximately 50,000 UGX) for cloud hosting.

****Best for schools that:**** Want a fresh start with one simple system and minimal IT dependency.

OPTION B: CONNECTED SYSTEM

****OneCard connects to your existing school database.****

Aspect	Detail
How students get in	OneCard reads live from your current student database.
How payments get in	OneCard reads live from your payment records.
Where data lives	Your existing database stays on your server or is moved to the cloud.
Internet needed	Yes – your database must be accessible online 24/7.
IT support needed	Moderate – requires someone to maintain the database connection and server.
Setup time	2-3 weeks (includes database connection setup and testing).
Monthly cost	~\$14 for cloud hosting + initial IT setup fee.

****Best for schools that:**** Want to keep their current student management system and have reliable IT support.

4. QUICK COMPARISON

Feature	Option A (Standalone)	Option B (Connected)
Setup time	1 week	2-3 weeks
Monthly cost	~\$14 (~50,000 UGX)	~\$14 (~50,000 UGX)
Internet required	For file uploads only	24/7
IT person needed	No	Yes
Data entry method	Upload Excel files weekly	Automatic from your system
Works during power cut	☑ Yes (cloud-based)	✗ Depends on school server
Independence	Fully independent	Depends on your database
Best if you want...	Simple, fresh start	Keep existing system

5. WHAT WE NEED FROM YOU

Item	Required For
Student information	Names, admission numbers, classes, streams, categories (day/hostel), gender
Fee structure	Total fees per class and category (e.g., S.1 Day: 700,000 UGX, S.1 Hostel: 1,200,000 UGX)
Staff list	Names, roles (Admin, Bursar, Gate Staff, Class Teacher), phone numbers
Payment records	Initial payment data to calculate current balances
Student photos	Optional – for printing on student cards (recommended)
School badge/logo	For card design and system branding

6. COST BREAKDOWN

Item	Cost	Frequency
OneCard Software	Development complete – no license fee	One-time
Cloud Hosting (Render)	~\$14/month (~50,000 UGX)	Monthly
PVC Card Printing	~2,000-3,000 UGX per card	One-time per student
Webcams (for scanning)	~50,000-100,000 UGX each	One-time (if needed)
Staff Training	To be discussed	One-time
Technical Support	To be discussed	As needed

7. BENEFITS TO YOUR SCHOOL

Cost Savings

- Eliminates monthly card printing costs
- One PVC card lasts the student's entire school life
- Uses existing computers and webcams – no expensive hardware

Efficiency

- Fee verification: from minutes to seconds
- Attendance: fully automated
- Reports: generated instantly – no manual compilation

Security

- Real-time tracking of student movement
- Meal access control prevents abuse
- Every action logged with timestamp and user

Accountability

- Permanent digital audit trail
- Data-backed decision making
- Transparent fee tracking

8. NEXT STEPS

Step	Action
1	**Review this proposal** with your administration team
2	**Choose Option A or B** for data management
3	**Complete the decision form** at the end of this document
4	**Provide student and staff data**
5	**Schedule staff training** (1-2 days on-site)
6	**Go live!**

9. ABOUT HERMAN SOFTWARE SOLUTIONS

Herman Software Solutions Limited is a Ugandan software development company specializing in building practical, reliable software for schools, businesses, and institutions.

We focus on creating systems that solve real problems – using technology that works in our local environment.
